

Sacramento Regional Transit District

Fact Sheet

System Profile

The Sacramento Regional Transit District (RT) operates approximately 93 bus routes and 37.4 miles of light rail covering a 418 square-mile service area. Buses and light rail run 365 days a year using 76 light rail vehicles and 248 buses (February 2008) powered by compressed natural gas (CNG). Buses operate daily from 5 a.m. to 11:30 p.m. every 15 to 75 minutes, depending on the route. Light rail trains begin operation at 4:30 a.m. with service every 15 minutes during the day and every 30 minutes in the evening. The Blue Line trains run until 1:00 a.m. and the Gold Line to Folsom runs until 7:00 p.m.

Passenger amenities include 47 light rail stops or stations, 26 bus and light rail transfer centers and 18 free park-and-ride lots. RT also serves over 3,600 bus stops throughout Sacramento County.

Annual ridership has steadily increased on both the bus and light rail systems from 14 million passengers in 1987 to more than 31 million passengers in FY 2007. Weekday light rail ridership averages approximately 51,000, which accounts for approximately 88% of the total system ridership. Bus weekday ridership has reached an average of approximately 58,000 passengers per day.

RT's entire bus and light rail system is accessible to the disabled community. RT also provides a door-to-door transportation service (in accordance with its responsibilities under the Americans with Disabilities Act) for Sacramento area residents who are unable to use fixed-route service. RT provides this service through a contract with Paratransit, Incorporated. Paratransit ridership has more than doubled since 1993.

RT's Community Bus program provides smaller circulator "Neighborhood Ride" buses to six neighborhoods in Sacramento County.

History and Organization

RT began operations on April 1, 1973, with the acquisition of the Sacramento Transit Authority. Later that year, RT completed a new maintenance facility and purchased 103 new buses.

Over the next decade, RT continued to expand bus service to the growing Sacramento region while a cooperative

effort emerged among city, county and state government officials to develop a light rail system. In 1987 the 18.3-mile light rail system opened, linking the northeastern (Interstate 80) and eastern (Highway 50) corridors with Downtown Sacramento.

RT completed its first light rail extension in September 1998 with the opening of the Mather Field/Mills station. In September 2003 RT opened the first phase of the South Line, a 6.3-mile extension to South Sacramento. In June of 2004, light rail was extended from the Mather Field/Mills station to Sunrise Boulevard. On October 15, 2005, light rail was extended 7.3 miles east from the Sunrise station to the city of Folsom. This extension included four new stations. In December 2006 RT completed the final segment of the Amtrak/Folsom Corridor Project, when it opened the .7-mile light rail extension to Sacramento Valley Station. This connects light rail with Amtrak inter-city and Capitol Corridor service as well as local commuter buses.

RT is governed by an 11-member Board of Directors comprised of members of the Sacramento, Rancho Cordova, Citrus Heights, Elk Grove and Folsom city councils as well as the Sacramento County Board of Supervisors. The fiscal year 2008 operating budget is \$147.7 million, with a capital budget of \$141.7 million.

RT employs a work force of approximately 1141 (February 2008) people, 77 percent of whom are dedicated to operations and maintenance of the bus and light rail systems. RT operates three maintenance and operations facilities – one for buses at 29th and N Streets, one for the Community Bus Service at McClellan Park, and one for the light rail system at 2700 Academy Way in north Sacramento.

Light Rail Expansion

As light rail ridership increases, RT continues to extend the rail system. South Line phase 2 project, which is the highest priority transit project in the region, will extend RT's South Corridor light rail service from the existing terminus at Meadowview Road to Cosumnes River College. The 4.2-mile extension will include four new stations.
